INSTITUTION OF ENGINEERS IN SCOTLAND.

The Engineering review.

THE ENGINEERING REVIEW

EDITED BY
C. EDGAR ALLEN,
Assoc. of the Institution Mech. Engrs., of the Instn. Elect. Engrs.,
Memb. of the Société Internationale des Electriciens, Paris.

VOLUME XI
JULY TO DECEMBER,
1904.

LONDON:
THE ENGINEERING REVIEW CO., LTD.

191999

INDEX TO VOLUME XI.

Editorials, 1, 73, 153, 233, 313, 394

Thermal Storage, 1
Electricity Legislation, 2
Terrestrial Heat, 3
Gas Engine Research, 4
The "Northumberland" Clause, 73
The Structure of the Atom, 75
High-Speed Locomotives, 77
Superheating, 153
The Tariff Commission Report, 155
New Irrigation Works for Egypt, 156
Revised Fire Rules, 158
The Single-Phase Motor for Electric Railways, 233
British Patent Laws, 235
Gas Engine Research, 235
Steel, 236
Smokeless Steam Coal, 237
The Panama Canal, American Fiscal Tactics, 238
Mechanical Grabs, 238
Turbine Steamers on the Irish Channel, 239
Gas Turbines, 313
Binary Vapour Engines, 315
Our Canals, 316
High Tension Transmission, 318
A Remarkable Mexican Power Scheme, 319
A 40,000-volt System in Italy, 319
An American 80,000-volt Experimental Line, 320
High-Tension, Direct-Current Transmission, 320
Some Difficulties in Getting on, 394
Municipal Expenditure, 396
Magnetic-Flux Distribution in Toothed-Core Armature, 397
The Cost of Production, 398

Special Articles.

Longitudinal Circulation in Steam Boilers, 5
The Theory of Steam Turbines.—III. By Frank Foster, B.Sc., 9
The Governing of High-Speed Engines.—I. By J. H. Dales, A.M.Inst.C.E., 17
Rock Drills. By Ewart C. Amos, M.I.Mech.E., 20
Raising Water by Compressed Air. By C. T. Alfred Hanssen, Assoc.M.Inst.C.E., 33
Internal Combustion Motors. By Dugald Clerk, M.Inst.C.E., 50
Accuracy in Testing Materials. By W. C. Popplewell, M.Sc., A.M.Inst.C.E., 81
Fire-Resisting Construction. By W. N. Twelvetrees, M.I.Mech.E., 90
Corrosion in Steam Boilers. By H. C. Standage, 93
A New Process for the Protection of Iron and Steel from Corrosion. By Sherard Cowper-Coles, A.M.Inst.C.E., M.I.E.E., 101
The Westinghouse System of Multiple-Unit Train Control, 108
The Poulsen Telegraphone. By Alfred Gradenwitz, 116
Coke Ovens and their History. By Paul J. Mallmann, M.A., 159
The Advantages of Superheating or Steam Jacketing as applied to the Steam Turbine. By A. H. Gibson, B.Sc., Wh.Exh., 161
The Fatigue of Metals. By Arthur N. Kemp, 168
Fire-Resisting Construction. By W. Noble Twelvetrees. M.I.Mech.E., 179, 246
Liquid Air: Its Production and Commercial Value, 187
Piney Creek Trestle Bridge on the Tennessee Central Railroad, (*Communicated*), 241
Modern Appliances for the Economical Handling of Material. (Grabs, Excavators, etc.) By Henry E. P. Cottrell, A.M.Inst.C.E., 250
Telegraphic Transmission of Photographs, (*Communicated*), 265.
The Engineering Plant of the Savoy Hotel. By Sydney F. Walker, A.M.Inst.C.E., M.I.Mech.E., 321
High-Power Gas Engine Plants in America. By Frank C. Perkins, A.M.Am.I.M.E., 328
The Production of Iron and Steel by the Electric Furnace. By W. McClure, 335
The Design of Fly-wheels. By A. H. Gibson, B.Sc., 401
Gold Coast Palms. By Lindsay W. Bristowe, 409
Air Compressors and their Valve-gear. By Charles Hurst, 415
The Construction of Towns. By Prof. L. Cloquet (University of Ghent), 421

Notes on Locomotive and Railway Engineering.

Power-Reversing Gear for Locomotives, 42
Great Eastern Goods Engines, 43
New Suburban Carriages for the L. & N. W. Ry., 43
Another Cylinder Arrangement for Compound Locomotives, 48
New Wagons for the L. B. & S. C. Ry., 49
New Erecting Shop at the Vulcan Foundry, 132
Testing Locomotives, 133
Wagons for the Central South African Railway, 135
Cole's 4-Cylinder Balance Compound Locomotive, 137
Great Central Accelerations, 137
Experiments Relating to Locomotive Chimneys and Blast Nozzles, 209
A 4-Cylinder Atlantic-Type Express Locomotive, 211
Steam-Motor Coaches for the Midland Railway, 288
New 4-4-0 Type Express Locomotives, 291
The Bagnall-Price Valve Gear, 292
Superheating Trials in Germany, 293
Smoke Gas Analysis and Locomotive Evaporation Tests, 357
Steam Motor Carriage for the Glasgow and South-Western Railway, 358
New Bavarian 4-Cylinder Locomotives, 359
A Novel Cycle Van, 362
Walschaert Valve-gear on the Great Northern Railway, 443
Steam Motor-car, Great Northern of Ireland Railway, 443
2-6-0-Type of Locomotive with Superheater, 445
The Simplon Tunnel, 447
The Railway round Lake Baikal, 448

Engineering Progress.

Experimental Steam and Explosion Engines, 58
A New Blower, 60
The Concentric Condenser, 139
A New Process for Cold-Soldering Band-Saws, 140
New Radial Drilling and Tapping Machine, 141
Launch of the latest Cunarder, the ss. *Caronia*, 202
Air as a Lubricant, 204
A Plant for Manufacturing Concrete Blocks, 205
A New Dock for Swansea, 207
Direct-Casting from the Blast-Furnace, 212
Heysham Harbour and the New Midland Route to Ireland, 216
Birmingham Welsh Waterworks, 221
Brazing Cast-Iron, 224
New Key-Way Slotter, 224
Aërial Ropeway at Aberfeldy, 275
New Air-Valve Drill, 277

Index to Vol. XI.

Coke-Oven Gas-Driven Electrical Installation at Tinsley Collieries, 277
The Action of Ball Mills, 279
A New Coil Clutch 280
The Specific Heat of Superheated Steam, 281
An Experimental Double-Acting Petrol Engine, 283
Electrical Coal Haulage at Huddersfield, 286
Setting Rings, 287
Machining Hollow Flanges, 245
Turning Twist-Drill Shanks, 246
A New Sinking Pump, 346
An Overhead Track for Foundries, 347
A New Bench Vice, 348
Steam Navvy of New Design, 351
Developments in Fire Apparatus, 352
The Stolze Gas Turbine, 354
Brick-making from Destructor Clinker, 429
Auto-motor Water Wagon, 430
Improved "Pop" Safety-valve, 430
Ferro-concrete Bow-string Bridge, 434
Pumping Plant for the Coolgardie Water Supply, 438
Improved Ship Ventilator, 440
Special Hack Saw Machine, 441
Granite-Asphalte, 441

Abstracts.

The Thermal Effect and the Practical Utility of Superheated Steam, 62
Specific Heat of Superheated Steam, 62
Water-Tube Boilers, 64
The Detection of the Finishing Temperature of Steel Rails by the Thermo-magnetic Selector, 64
Electrolytic Iron, 65
The Effects of Straining and Annealing, 65
Tungsten Steels, 66
Chemical Classification and its Application to the Constituents of Steel, 66
Experiments with a Lathe-tool Dynamometer, 67
Gases in Pig-iron, 68
The Resistance to Motion of Railway Vehicles and the Peformance of Locomotives, 69
Aërial Navigation, 70
Asphalt Reservoir Lining, 70
Devices for Removing Chips and Dust, 71
Notes on the Packing of Machinery for Export, 71
Tooth-Curve Drawing Instrument, 71
The Mechanism of Combustion, 143
The Specific Heat of Superheated Steam, 147
Experiments on the Utilisation of Peat, 148
Iron-Ore Mining in Scandinavia, 149
Testing Steels for Electrical Purposes, 149
Some Examples of the Irregular Distribution of Sulphur in Pig-Iron, 150
Carbon, 150
Alloy Steels, 150
Modern Methods of Steel-Casting, 150
High-Speed Operation of Normal Railways, 150
Commercial Practicability of Electric Traction by Surface Contacts, 151
Mechanical Draught for Boilers, 225
Design and Test of a Steam-Power Plant, 227
A Factory Research Laboratory, 228
Influence of Lateral Pressures on the Crushing Resistance of Solid Bodies, 229
State of Electrical Industry in Spain, 230
Mining, Past and Future, 231
Carborundum Fire Sand, 231
Test for Brittleness in Structural Steel, 231
The Structure of Metals and Alloys, 231
Molybdenum Steels, 232
Flame Temperature in Internal Combustion Motors, 298
Universal Testing Machine of 300 tons for Full-sized Structural Members, 305
Flexure of Reinforced Concrete Beams, 310
A Scientific Investigation into the Possibilities of Gas Turbines, 366-374
On a Process for Operating Gas Turbines, 374
A Simple Dynamometer, 376
The Modern Telephone, 378-383
70,000-Volt District-Current Tests made at Geneva, 383-387
Coast Erosion, 455
Erosion on the Holderness Coast, 455
Chlorine in Metallurgy, 456
The Blake-Morscher Electro-Static Separator, 457
Impact Tests on the Wrought Steel of Commerce, 459
On Power Gas, 465
Lutes and Cements, 466
The Distribution of Electrical Energy, 468
Centrifugal Fans, 469

Book Reviews. 7, 122, 199, 271, 355

Metallurgical Progress. By Percy Longmuir, Carnegie Research Scholar

Steel.

Recherches Physiques et Physico-Chimiques sur l'Acier au Carbone, 294
Steels Containing Titanium, 363
Steels Containing Tin, 363
Tensile and Impact Tests of Metals, 363
Acid Open Hearth Manipulation, 449
Tool Steel Forging and Tempering, 450
Notes on Cementation, 450
Vanadium Steels, 451
Mechanical Properties, 451
Trial of a Method of Classifying Steel, 452

Blast Furnace Practice.

Conduit System of Handling Blast Furnace Stock, 295
Galey Method of Extracting Moisture from Air, 364
Special Forms of Blast-Furnace Charging Apparatus, 364
Blast-Furnace Slag as a Structural Material, 364

Cast-Iron.

Chemical Specifications, 295
Observations on Cast Iron, 296
The Glazing of Siliceous Pig-iron, 296
Cast-Iron Borings, 296

Malleable Cast-Iron.

Research Work, 296
Loss in Malleable Foundries, 297

Foundry Practice.

Use of Manganese in Cupola or Ladle, 452
A Method of Moulding Chains, 453
Shrinkage Troubles and Methods of Feeding, 453
Cost of Melting Brass in Oil Furnaces, 454

General.

Freezing Point of Antimony-Tin Alloys, 297
Hedbury's Simplex Process for Separating Refactory Ores, 365
Some Neglected Details in the Experimental Study of Alloys, 365
Alloys of Zinc and Magnesium, 365
The Manufacture of Zinc Oxide, 454
A West African Smelting House, 454
Comparison of Methods for the Determination of Carbon and Phosporus in Steel, 454
